"Construction/Coverage-Commencement of Service Deadline Reminder for call sign WQEN288"

Dear KENT WETHERHOLD;

The Federal Communications Commission has stated that they will institute the termination of those licenses or coverage requirements. This is an automated feature within the FCC's Universal Licensing system and effective 2006. *Our review of the FCC database shows that you have not yet filed your Construction/Notification for WQEN288 and frequencies associated with that call sign may be terminated.* This filing is known as the Construction/Notification.

FAILURE TO COMPLY WITH THIS FCC REGULATION WILL CAUSE YOUR LICENSE TO BE AUTOMATICALLY TERMINATED, IN WHOLE OR IN PART (WHERE APPLICABLE) ON THE CONSTRUCTION/COVERAGE DEADLINE DATE. SEE 47 CFR SECTION 1.946© AVAILABLE FOR REVIEW.

Your license was issued on 20060309 with a construction deadline date of 20070309 under call sign WQEN288. If you do not file the appropriate application of notification could cause your license to be automatically terminated. You may file an additional application (Construction/Notification) with the FCC verifying that you are using the frequencies.
